-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 16 October 2009.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/16/2009 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1,3,4 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 9 include the transitional phrase "consisting of" which closes/limits the claims to just the specific elements listed in the claims. However, both claims also include in the body of the claims "elongated body further comprising" which opens the claims to other elements. Once a claim is limited by using "consisting of" terminology, the Applicant cannot open the claim by using "comprising" terminology in the body of the claim. See MPEP 2111.03 [R3]. It is unclear if the Applicant is trying to close the claims or open claims to other possible elements.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1,4,5 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Hickok (US 2002/0072035).

Hickok discloses an adaptor (90) consisting of: an elongated body (Fig. 10) having a distal end (86) and a proximal end (80) securely mating to a handpiece [0047] and the distal end securely matingly connected to a tip (110); a through bore (88) located within the elongated body (Fig. 10); the through bore shown in fluid communication with the conduit of the handpiece and through bore of the tip (Fig. 9); and wherein the adaptor has a Luer-Lock style connection (Fig. 9) and wherein the adaptor is capable of being autoclaved.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hickok in view of Feine (US 6,164,968).

Art Unit: 3732

Hickok discloses the invention substantially as claimed except for wherein the adaptor is made of plastic.

Feine teaches an adaptor made of plastic (column 4, line 9). It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Feine to include an adaptor made of plastic, as taught by Feine, in order to provide an alternate suitable material that is well known in the art. Furthermore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Hickok to include an adaptor made of plastic, as taught by Feine, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. See *In re Leshin*, 125 USPQ 416.

Response to Arguments

8. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.
